Welcome Speech

Prof.Dr. Lush Perpali

Rector

Dear participants, professors, researchers, guests, colleague,

Honorable members of the panel

Ladies and gentlemen,

Good morning and welcome.

As it is known already, this international conference titled "**Intercultural studies in the field of justice, economic and social sciences**" is organized in the framework of the implementation of the Erasmus + project, in cooperation with our national and international partners

Our university college comes to this conference already consolidated as an institution of high value in the Albanian higher education. This is expressed not only by the fact that Wisdom University College is both institutionally licensed and accredited, as well as with all the programs. In addition to this, a valuable contribution has been made to the fields of culture of economic, legal, psychological, and different social issues. Year after year at scientific conferences or in different activities, works have been evaluated not only by the academic staff but also by our external associates, either from the field of business or from public institutions.

Today's international conference is important for her own purposes, to address scientific work in the field cultural studies in justice, economic , social humanities and beyond, judging that it is necessary that professors, researchers, scholars of the business and social sciences from public and private higher education institutions within the country, in the region or beyond, to contribute their ideas, knowledge and scientific arguments for the **intercultural** development of the society, giving a contribution which is an added value for the present and the future of the society.

Studies, conferences aim to influence the enrichment of scientific thought in the fields treated, the giving of thoughts to the improvement of economic and social indicators, the consolidation the state and law, the positive evolution of public opinion, enriching more and more in all aspects of life, the culture of the society we live in.

Of course during these transition years, Albania has made progress in all areas. This is also true in our region and beyond. But we know that many things could have been done better and that the challenges we have,are not easy, but pose a lot of problems, some of which, certainly will be treated here in this international scientific conference by the referrers.

A society when, while technology goes a long way ahead, in fact, the economic and social problems for most people do not positively follow the same rhythm.

In a society that is becoming more and more indifferent to the problems of the community, where everybody looks at his condition and does not worry not only what happens to the neighbor, but often to what happens to relatives or friends, in a society that reacts little, to negative phenomena and arbitrary actions, studies of these fields, also take special importance in cultural, psychological and social terms.

Albanian society, in a very short time, is extremely polarized; on one side in a small group that are very rich and, on the other hand, by poor people at the lowest level of survival. Studies in this area would also be of interest to learn how this has happened.

Certainly in this conference we do not intend to solve all the problems but to contribute to the identification, study and giving our valuable suggestions to enrich the scientific opinion in these fields and similar to these.

Dear participants,

For coincidence this conference is on the same day as European Union Day is. Albania has done a lot of work, especially in standardizing legislation by meeting the admission criteria. But for us the Europe is still a dream. We hope that this to become a reality sooner and, on the other hand, Europe itself will not have anymore Brexit type phenomena.

On this occasion, I would like to thank all the researchers that will present their contributions at this conference and that represent important institutions of higher education and not only within in our country but and our partners outside the borders of Albania as well.

Special thanks go to our collaborators in the successful organization of this international conference.

Now, by closing this short welcome speech, I wish success to all the contributors who have prepared their papers to present at this conference.

Once again I thank all the participants here.

I wish a very successful and fruitful conference.

Thank you for your attention!
